Dear Customer,

We are proud to present to you our new autumn catalogue 2020. CSW Landscaping is the wholesale address where the professional horticulturist purchases his or her bulbs. Our large range of flower bulbs has specifically been selected to meet the demands of landscapers, municipalities, botanical gardens and other horticulturists who incorporate large quantities of flower bulbs.

Our assortment has been further expanded and revised to meet your requirements even better, and behind the scenes we are working hard on innovative developments. Fortunately, this is possible thanks to the continuous growth of recent years and the valuable feedback from you, our customer. Over the past few years, we have seen a growing interest in ready-made mixtures, particularly sustainable mixtures that flower over several years. Therefore, our assortment is richly filled with mixtures that will bloom beautifully year after year.

We also want to satisfy the demand of the horticulturists who want to compile a mixture themselves, or in collaboration with us. Whether you want a colourful border with botanical tulips or a wonderfully fragrant mixture that attracts bees and butterflies, it's all possible!

In addition, the CSW Landscaping team has its own planting machines and, at least as important, people with expertise to make every planting plan a success.

As well as the above advantages of buying flower bulbs from CSW Landscaping, you can also count on us for excellent quality flower bulbs and proper delivery. To simplify and speed up the ordering process, you can also order your flower bulbs online through our online store: www.cswlandscaping.com.

We hope that you will enjoy browsing through our catalogue and look forward to welcoming you again as a customer this autumn!

CSW Landscaping Team

Who are CSW Landscaping?

CSW Landscaping is part of the CSW Group that has held a leading position as a supplier of flower bulbs for more than 90 years.

Our goal is to make bulb flowers easily accessible for municipalities, gardeners, botanical gardens and other horticulturists who incorporate larger quantities of flower bulbs. We are also happy to help you design and implement a planting plan for your project.

In this way, together with you, we ensure that your project is in full bloom with the most beautiful colours. Thanks to carefully composed mixtures with early flowering and late flowering varieties, you can enjoy a wonderful spectacle of scents and colours for a long time. We are also happy to think along with you by offering for example low-maintenance mixtures that are suitable for multi-year flowering.

Thanks to our online ordering portal www.cswlandscaping.com, purchasing flower bulbs has never been easier. In a few clicks you have immediate insight into our assortment, availability and delivery time.

Transparency

No complicated price lists, our handy packaging has a clear price. In a few clicks you have selected your bags of tulips and other bulbs, paid and delivered to your home within a few days. The indicated prices are based on the smallest packing unit. If you need large numbers for your project, we will gladly make a customised offer.

Simplicity

In your personal account you have an immediate overview of your orders, payment term, order confirmations etcetera. After ordering you will automatically receive an order confirmation in your mailbox. Are you looking for something outside of our assortment? We have the largest possible access to suppliers in the Bulb Region, the historical Dutch flower-growing area. You can also choose to request a quote online. This can easily be converted into an order.

Freedom

You can order wherever and whenever you want. If this has to happen in the evening after a busy day at work, then this is done in a few clicks. You choose the desired delivery method yourself. The next morning we see your order. If you have a personal account, the agreed payment term is automatically used. If you order without an account, the order will be paid in advance.

We are constantly optimising our products, delivery methods, delivery times and our services. Online orders can be sent the same day with immediate availability and can be followed with a track & trace.

If you have any questions about our products and services, the CSW Landscaping team is ready to assist with its knowledge and expertise.

MIXTURES

Early Bird

A colourful mixture of *Crocus chrysanthus* for an early spring feeling. This mixture flowers before the larger *Crocus vernus*.

Blue Grass

Mixture of only white, blue and striped Crocus vernus.

150

15

2-3

Colour Carnival

The classic Crocus vernus mixture with all colours. Like all crocus mixtures ideal for naturalising in grass.

10

Jesperhus Mix

Gentle coloured from the Danish Jesperhus Blomsterpark. The white en purple colours softened by the creamy yellow brightens up the park every year.

80

30-50

4-5

Dancefair

A cheerful mix of elegant lily flowering tulips in several heights. The combination of bold and more soft tone colours brings royalty to every garden.

M²
80

45-60

4-5

Silkeborg Mix

Mixture of 8 hardy varieties starting yellow and ending in white colours.
Performs well in colder climates.

Tiny Bubbles

A good mixture for early colour. This mix includes glory-of-the-snow, small tulips, muscari, snowdrops and crocuses. Good for naturalising in an informal landscape.

Dynasty of Emperors

A Dynasty formed by the well-known Emperor Tulips in all its bright colours. These Fosteriana Tulips are well known for their ability to return 2 or 3 years.

Garden Party

A mixture of the complete Van Eijk family. Each family member has the same strong characteristics: big, bowl-shaped flowers and a strong performance for 2-3 years.

Summer Breeze

Mixture of pastel coloured Darwin Hybrid Tulips. With its impressive flowers, this mix gives a robust look to every garden display.

Cool Waters

Subtle mix of cool blue muscari and daffodils that slowly mature to completely white, like sails on an ocean.

Pink Champaign

An exciting mix of 2 peony like flowering tulips. The many petaled flowers give this mix a luxurious look.

M²   
60 35-40 4-5

May Romance

This mixture does exactly what its name says: creating romance in the wedding month of May.

M² 60 🌱 45 ☀️ 4-5 🚜

Spring Cocktail

The yellow and white flowering varieties brighten up every garden display and the soft pink tones give a little tropical touch to this mixture.

M²

↑
25-55

☀
3-5

Babyshower

A nice mix of a bright pink tulip and a sweet fragrant narcissus.

Purple Rain

The different shades and shapes of purple in this mix prove to be a good companion of the softer yellows. Surprising contrast with a great effect.

70

55

3-4

Murillo Mix

This mix is a true explosion of colours. Nice, short tulips with strong stems. Excellent for pots.

Smokey Mountains

The different shades of purple resemble The Smokey Mountains described by the native Indians as Mountains of the Blue Smoke.

Mélange Paris

A mixture of long stemmed, late flowering tulips. Excellent for mass planting.

Lilac Morning

A mix of different shades of pink, purple and lilac. The difference in height creates a multilevel show.

M²
70

↑
30-50

☀
4-5

Little Rascals

Surprising what some little varieties can do. This mix of low growing varieties can easily compete with its taller competitors when it comes to brightening a garden

Bowl of Plenty

Mix of tulips with many petaled bowl shaped flowers. You will be amazed by the abundance of colour when this mix is in full bloom.

Lady Marmalade

A rich mixture of numerous varieties with a colouring from soft peach tones to bold orange. From low growing varieties to really tall ones. This mix has everything! Extremely long flowering period. The crown imperial give this mix an extra dimension.

  
80-100 10-90 3-5

Joy of Spring

This blend has been developed in the spirit of the historical Tulip Insulinde.

This blend contains more than 30 varieties. It includes early bloomers like crocus and iris. For the late season there will be tulips, alliums and camassia.

These varieties make up a soft Scandinavian spring theme.

M²  
80-100 10-90 3-5

From Dusk till Dawn

A mixture of bright coloured tulips topped off with tall fritillarias, which resembles sunrise and sunset in one mix.

M² 80 10-90 4-5

Prince of Love

Mixture of tulips from the well-known “Prince” tulips. In this mix they prove to be a harmonious family.

Grower's Pride

Very good mix with narcissi in all shapes and sizes. A guarantee for a very long flowering period.

Relief of Leyden

A fantastic low-flowering mixture in bright colours, with the blue of muscari and camassia, the purple of allium and the orange-yellow of botanical tulips. This mixture will be flowering for three months and is ideal for machine planting in verges or parks.

Victory of Alkmaar

A low-flowering mixture of kaufmanniana tulips and crocuses, an ideal combination for machine planting. Victory of Alkmaar is a lovely combination of the Hanseatic colours red and white. Or the colours of the city of Alkmaar or your favourite football club, of course. Other combinations at request.

Capture of Brill

A low-flowering mixture of a beautiful kaufmanniana tulips and mixed crocuses.
This combination is ideal for machine planting in municipalities or parks. Other combinations at request.

April Fools' Day

Mixed crocuses with a twist! Instead of the large-flowering yellow crocus, a beautiful yellow narcissus will show up, the ultimate surprise in March-April. This mixture is especially suitable for machine planting.

Tulipa clusiana Mix

The classic mixture of low-flowering clusiana tulips in soft colours. Ideal for machine planting.

Dance Parade

Mixture of "Dance Tulips". These cheerfully dancing brothers are both viridiflora and lilyflowering and fit perfectly together in height and flowering time. The varieties are also available separately.

Spring Fire

Sparkling new and colourful mixture that starts in the fiery colours red, orange and yellow, later changing into a combination of red, orange and black. The mixture can be beautifully combined with, for example, black violets and wallflowers (Cheiranthus).

70

55

3-5

Darwin Hybrids Mix

The most beautiful tulips in a fantastic mixture: darwin hybrid tulips in their soft colours are known as long-flowering tulips on firm stems and are an asset in every garden. Darwin hybrids are single-flowered, mostly available in the colour palette yellow-pink-red-orange and are excellent for group planting. Planted at the right depth (about 15 cm), they can continue to flower for a number of years in succession.

70 55-60 4

Triumph Mix

An eclectic mixture of the most beautiful triumph tulips. Because of the different months of flowering, this mixture will be flowering for a number of months in succession. Tulip mixtures can be planted by machine and will easily infuse colour in an embankment, roundabout or sports park in spring.

70 45-50 4

The important role of bees

Over the last few years, there has been more and more interest in the role of bees within our ecosystem. And rightly so! Bees take care of the pollination of more than three quarters of our food crops. Without bees, there would not be any cherries, apples, peppers or even coffee.

It is therefore of the utmost importance to care about bees and to support them where we can because bees have been going through difficult years recently. Due to the gradual decline of their natural environment, both in terms of quality and quantity, bee colonies are under a great deal of pressure.

‘Flowering bulbs are often the first source of nectar in early spring.’

By taking a few simple measures, we can make their lives a lot more pleasant and easier. By sowing and planting the right crops, we can create an important source of pollen and nectar. Flowering bulbs can play an important role in this. Due to the early flowering period of the various bulbs, flowering bulbs are often the first source of nectar and pollen for bees in early spring when they appear after their winter rest.

At CSW Landscaping, we offer a broad assortment of flower bulbs that are a source of pollen and nectar. There are still a lot of differences between the varieties in terms of the production of nectar and pollen. Location and weather conditions also play an important role. There will be more pollen production on warm, dry days than on rainy days. We marked the varieties that attract bees with a special symbol  in our catalogue. Without bees there wouldn't be any flowers, so we are more than happy to foster their habitat.

TULIPS

Tulip Salmon van Eijk®

Darwin Hybrid Tulips

Darwin Hybrid Tulips are all single-flowered cultivars with long-lasting flowers on strong stems. This type of tulip is very suitable for mass planting in a landscape setting or, with its height of 50-60 cm excellent as a cut flower. When planted at a depth of at least 15 cm, this group of tulips is performing well for several years. Mid-season flowering.

Yellow Pomponette®

Lily Flowering Tulips

This group of tulips is named for the shape of their blooms, which resemble old species tulips from Turkey. Their long, pointed petals arch outward and, when fully open, look like a six-point star. Most varieties are blooming late in the season and grow up to 50-60 cm and are not as sturdy as most other tulips. However their grace and elegance easily compensate this.

Kaufmanniana Tulips

Kaufmanniana Tulips are, with some exceptions, generally low growing which make them ideal for rock gardens and containers. The flowers have pointed petals which open almost completely flat on sunny days. This type of tulip is also called waterlily tulip as a fully opened flower looks like a waterlily. The leaves are often striped or mottled. Early flowering and very suitable for naturalising.

Greigii Tulips

Greigii Tulips originated from *Tulipa greigii* species which are native to Kazakhstan. Greigii Tulips have large flowers compared to the plants as a whole. The flowers come in very bright colours often with two-toned petals and open wide in full sun. Greigii Tulips are ideal for rock gardens and pots as they are very short. The distinctive foliage is mottled with maroon stripes.

A close-up photograph of several Parrot Tulips. The flowers are large and have deeply feathered, curled, or twisted petals. The colors are vibrant, ranging from bright yellow and orange to deep pink and red. The background is a soft, out-of-focus green, suggesting foliage. The image is partially obscured by a white circular graphic element on the right side.

Parrot Tulips

These tulips were developed from mutations of certain late flowering and Triumph Tulips. The flowers are large and have deeply feathered, curled or twisted brightly coloured petals. Parrot Tulips are somewhat sensitive to cold and wet weather so they require a somewhat protected spot. Flowering season is mid to late. They make excellent cut flowers.

Species Tulips

Tulips that are wild, or close to wild, naturalise extremely well. As most tulips in this class are fairly short, they are absolutely ideal for rock gardens and pots. They also look wonderful when planted in large, one-colour flower beds.

Bulbs in public green spaces

We have seen a growing interest over the years in the use of flower bulbs in public green spaces. Flower bulbs bring us the first colours after winter and provide that spring feeling so many people long for after the cold, dark months. In fact, no other type of planting gives splendour to beds, parks, verges and lawns in spring with such a diverse array of colours and shapes. In addition to bringing colour, variety and cheerfulness, flower bulbs also play an increasingly important role in encouraging biodiversity. By using the right species, they can provide food for butterflies and bees. The flowering period of bulbs can play a crucial role here, given there are hardly any other crops that are a source of food for these insects that early in the year.

Our aim at CSW Landscaping is to respond in various ways to the growing demand for flower bulbs for use in public green spaces. This starts with the composition of our range. While we have a wide selection of tulips and daffodils, CSW Landscaping also spends a lot of time and care selecting our range of special bulb and tuber flowers. Many species in this group are highly suitable for use in public green spaces because of their ability to flower for several years in a row and the possibility to plant them mechanically.

Our product range includes individual species for use in public green spaces as well as various mixes. These mixes can be composed of species that bloom almost simultaneously to create a spectacular display or can also be used to lengthen the flowering period. A carefully selected mix makes it possible to achieve a flowering period of between eight and 10 weeks.

To support our customers in implementing their planting plan, CSW Landscaping offers the possibility of having the bulbs planted mechanically (under grass) and can offer advice about our product range. CSW Landscaping has its own planting machines and, just as important, people with the right expertise to make every planting plan a success. Contact one of our employees, free of obligation, for advice about the best plan for you.

‘Flower bulbs bring us the first colours after winter and provide that spring feeling’

NARCISSUS

Narcissus Apple Pie

Trumpet Narcissus

Trumpet Narcissus have the “traditional” narcissus form. One large blossom per stem and the trumpet is very long. Specifically: the length of the petals or longer. These daffodils are well known for their long blooming season and their very large blossoms. Excellent for landscaping and naturalising.

Large Cupped Narcissus

Large Cupped Narcissus is the group you see most often in gardens. Large Cupped Narcissus have a cup which is more than one third but less than equal to in length than the petals. This group of narcissus come in a wide range of colours and in a wide variety of cup shapes. Its flowers are extremely weather-tolerant and are suitable for every possible use: in beds, in borders, as a cut flower and for indoor forcing. Also suitable for naturalising.

Double Narcissus

This class of narcissus has flowers that have extra petals, a double trumpet or even both. Double Narcissus come in a wide range of colours. Good as cut flower and very suitable for beds and borders. Some varieties require some protection from the wind.

Yellow Cheerfulness

Split Corona and Papillon Narcissus

Varieties in this division have a very different flower form compared to the usual flower form. The term split corona refers to the cup which is split for at least 50% of its length. This makes that these varieties have open, upfacing flowers often resembling a hibiscus. Split Corona Narcissus varieties are suitable for mass planting and as cut flower. Most varieties flower mid-spring.

Cyclamineus Narcissus

This division of Narcissus has straight slender trumpets and reflexed petals. The reason why this division is called cyclamineus is that several varieties from this group strongly resemble a cyclamen. Cyclamineus Narcissus is one of the first groups to flower in spring. As most varieties from this group are rather small they are performing better when planted close together or in front of the border. They are also excellent for rock gardens and indoor forcing.

Jonquilla Narcissus

This division of Narcissus is known as the most fragrant division. The flowers come in a wide range of colours and have flat or slightly reflexed petals and a wide cup. The flower stems normally bear 2-6 flowers resulting in a long flowering period. They naturalise very well and flower mostly late in the season.

Poeticus Narcissus

This type of daffodil is also known as the 'poet's daffodil'. All species in this group have large white petals and a small corona in contrasting colours, often red and yellow, and are excellent for naturalisation. They have a lovely fragrance.

Actaea

poeticus var. Recurvus

Triandrus Narcissus

This group is known for its very colourful and long flowering period, not least because each stem contains more than one blossom. The somewhat pendant, nodding flowers have slightly reflexed petals. Most species from this group have a wonderful fragrance. These plants are suitable for use in pots and are known to be a superb naturalising daffodil when planted in a slightly shaded spot. The flowering period is from mid-April until well into May.

Small Cupped Narcissus

This group of daffodils does not differ much from Large-cupped Daffodils. The most striking difference is that the length of the cups is one third or less the length of the petals. Best suited for naturalisation in groups.

Tazetta Narcissus

This group of daffodils is known for its abundant bloom and a sweet, strong scent. These plants originate from somewhat warmer regions and are therefore slightly more sensitive to severe frost. However, they do fine in the western European climate. Excellent for use in borders and as a cut flower.

Crocus sativus

Crocus speciosus Albus

Crocus speciosus ssp. speciosus

Cyclamen hederifolium

Sternbergia lutea

Sustainability first

Corporate social responsibility is in the DNA of the CSW Group. As a company, we want to take responsibility for social issues such as air pollution and climate change. We therefore take a critical look at our business processes and are constantly optimising and making them more sustainable.

We started with the waste stream. The agricultural waste, cardboard, plastic and other waste is separated, disposed of properly and, where possible, recycled.

The quality of the products comes first, with respect for people, society and the environment'

As a participant in the Dutch Sustainable Trade Platform, we contribute to a future-proof flower bulb and perennial sector. The quality of the products comes first, with respect for people, society and the environment.

In 2018, 1785 solar panels were installed on the roof of our business premises. The yield corresponds to the predicted annual usage of our company. With this we have taken a big step towards a carbon (CO₂) neutral production process and since then we are certified with EU Energy Label A.

 Tuberbulb Export b.v.

GENERAL CONDITIONS of sales and deliveries of CSW LANDSCAPING BV. Leidsestraat 100, 2182 DR Hillegom Holland

1. Applicability

- 1.1. These terms and conditions only apply to agreements with regard to which one of the parties is a member of Anthos at the time of conclusion of the agreement, which – within the framework of these general terms and conditions – is also deemed to include other partnerships who are (in)directly affiliated to an Anthos member company.
- 1.2. All offers made by the seller and all contracts of sale entered into with the seller and the execution of such contracts of sale are governed by these conditions.
- 1.3. The applicability of general conditions of the buyer is expressly rejected by the seller.
- 1.4. Departures from the present conditions will only be valid if expressly agreed to in writing by the seller.
- 1.5. Insofar as these general terms and conditions are also drawn up in a language other than Dutch, in the event of any conflict the Dutch text shall always prevail.

2. Offers and conclusion of agreement

- 2.1. All offers and prices stated by the seller are free of obligations.
- 2.2. An agreement shall only come into effect once the seller has confirmed the order in writing.
- 2.3. Any supplementary arrangements or amendments agreed on at a later stage, as well as any verbal promises made by the seller's personnel or on behalf of the seller by agents or other parties working for the seller, will only be binding for the seller from the moment that the latter confirms them in writing.

3. Prices

- 3.1. All product prices are stated in Euro, are based on FOB, The Netherlands. Excluding PQ inspection cost.
- 3.2. If one or more of the cost price factors is subject to change after order confirmation but before delivery of the products, the seller shall be entitled to adjust the agreed prices accordingly.
- 3.3. The costs of transport, insurance and the inspections carried out by the Department of Phytopathology are payable by the buyer. All levies and/or taxes that are owed or become due, either directly or indirectly, on account of the agreement entered into between the seller and the buyer are payable exclusively and entirely by the buyer and may not be deducted from sums owed to the seller. For the cost of a Phytosanitary certificate we charge Euro 125,- per shipment. For the miscellaneous bulbs and Specie Tulips prices are mentioned by quantities purchased. For Hyacinths and Hippeastrum prices for quantities less than 5 boxes, per variety and per size, will be increased by 10 pct. Minimum order value must be Euro 2.000,- per shipment, otherwise terms will change from FOB into ex-warehouse.

4. Payment

- 4.1. Unless otherwise agreed in writing, payment for goods sold by the seller that are sent by air must be made within 30 days of the invoice date and, in the case of goods sent as sea freight, within 60 days of the invoice date in the agreed currency.
- 4.2. The value date on which the seller receives payment shall be deemed to constitute the date of payment. Where payment is made by means of a bank transfer, the date on which the seller's bank account is credited, shall be deemed to constitute the date of payment.
- 4.3. The buyer is not entitled to make any deduction, suspension or reduced payment and all calls for settlement are explicitly excluded. In the event of late payment, the seller will be entitled to charge the statutory interest for business transactions as of the due date, and also to charge any legal and extrajudicial costs incurred in collecting the amounts owed; the extrajudicial costs owed will never be less than 15% of the sum to be collected.

- 4.4. In case a delivery is effected in parts, the seller shall be entitled to demand payment for each partial delivery before proceeding with any other.

- 4.5. Upon or after entering into the agreement and before its implementation, the seller will be entitled to demand a guarantee from the buyer that both the payment obligations and any other obligations arising from this agreement will be fulfilled. Refusal by the buyer to provide the required security gives the seller the right to suspend its obligations and ultimately, without any notice of default or legal intervention, the right to dissolve the contract wholly or partially, without prejudice to his right to compensation for any damages suffered by him.

5. Delivery

- 5.1. All deliveries shall be FOB, The Netherlands, unless otherwise agreed in writing.
- 5.2. Although the stated time of delivery will always be taken into account as far as possible, this delivery time is approximately indicated and can never be considered a fatal date. The seller shall not be in default in respect of such delivery time until the buyer notifies it in writing that it is in default, in doing so stipulates a reasonable period of time within which the seller has the opportunity to effect delivery, and the latter still fails to do so.
- 5.3. The agreed delivery time shall commence as soon as the seller has confirmed the order in writing.
- 5.4. The seller shall not be liable for any harm due to late delivery if and insofar as this is attributable to circumstances beyond seller's control and sphere of risk, which is deemed to include late or non-compliance on the part of its suppliers.
- 5.5. The buyer's failure to comply with his duty to effect payment (or to do so on time), shall have the effect of suspending seller's duty to effect a delivery.

6. Force majeure

- 6.1. In a case of force majeure - for example in the event of a crop failure, viruses, natural disaster, labour strike, fire, or import and export problems - or in the case of other circumstances that make it impossible to demand the seller's fulfilment or timely fulfilment of the obligations arising from this agreement, the seller will be entitled to make a choice, without the need for legal intervention and without being obliged to pay any form of compensation, between completely or partially cancelling the agreement by means of a single written notice to that effect or the suspension of this agreement until the case of force majeure has come to an end.
- 6.2. Where the seller has already executed part of an agreement, the buyer shall pay the purchase price for any products that have been delivered.

7. Complaints

- 7.1. The buyer is obliged to check the products upon delivery for any visible and/or immediately observable defects. This means all defects that can be ascertained by means of ordinary sensory perception or a simple spot check. The buyer is moreover obliged to check whether the delivered products are also in accordance with other particulars of the order. Failure to fulfil the obligation to check the delivery shall mean the forfeiture of any claims the buyer may have vis-à-vis the seller.
- 7.2. If a delivery deviates less than 10% in terms of number, quantity and weight from that which was agreed, the buyer shall be obliged to accept the delivery in spite of such deviation.
- 7.3. Complaints regarding the quality and quantity of the products delivered must be submitted by registered mail or e-mail at the latest within seven calendar days after delivery at the port of arrival. Defects which can only be observed at a later stage (non visible defects) shall be forthwith reported to the seller after this has been observed. Once these periods have passed, the buyer will be considered to have approved the products supplied and complaints will no longer be considered.

- 7.4** The complaint must contain a description of the flaw and the seller must upon first request be given the opportunity to investigate the complaint. The buyer shall allow the seller to have the concerned products examined by an expert or an independent inspection service. If the complaint turns out to be well-founded, all the costs of any investigation will be for the seller's account. If a complaint is groundless, all the costs will be for the buyer's account.
- 7.5** If the buyer has reported a complaint to the seller in a timely manner and the seller has acknowledged this complaint, the seller shall only be obliged to deliver that which is missing, replace the delivered products or repay a proportional part of the purchase price, such as at the seller's own discretion.
- 7.6** A complaint shall not suspend the buyer's payment obligation, unless the seller agrees expressly with such suspension.
- 7.7** The products can only be returned for the account and risk of the buyer and only after prior written permission has been obtained from the seller.
- 8. Liability**
- 8.1** The seller will never be liable for the results regarding the flowering of the products supplied. It always remains buyer's responsibility to assess if the circumstances, among which the climatological, are fit for the products.
- 8.2** In case of a shortcoming attributable to seller, seller's liability is always limited to a maximum of the net invoice value of the products or to that part of the net invoice value to which a claim for compensation is directly or indirectly related.
- 8.3** Except in the case of legal liability pursuant to provisions of mandatory law and a deliberate act or omission, or gross negligence, any liability of seller for any further damage, among which any direct or indirect damage, consequential damages or lost profits, is excluded.
- 8.4** The buyer shall indemnify the seller against all claims for compensation brought by third parties in respect of which the seller is not liable under these terms and conditions.
- 9. Cancellation**
- 9.1** The seller will be entitled to cancel an order if the buyer has failed to comply with earlier payment obligations with respect to the seller or with respect to other creditors. This right may also be exercised if the seller considers the information concerning the buyer's credit rating to be insufficient. The buyer will never be able to derive any rights from such cancellations or hold the seller liable.
- 9.2** The seller will only be required to accept the buyer's complete or partial cancellation of the agreement, as a result of any cause whatsoever, if the goods have not yet been delivered to the transporter for despatch and on condition that the customer pays compensation equivalent to at least 25% of the invoice value of the cancelled goods. The seller shall in that case also be entitled to charge all costs incurred up to that time.
- 9.3** The buyer is obliged to accept the products at the time that they are made available to him. If the buyer refuses to accept the goods, the seller will be entitled to sell them elsewhere and the buyer will be liable for the difference in price as well as all the other costs incurred by the seller in connection with this, among which costs of storage.
- 10. Retention of title**
- 10.1** The ownership of the goods supplied by the seller does not pass to the buyer until the sums invoiced, plus any interest, penalty and costs, as well as all claims as a result of the buyer's failure to perform its obligations towards the seller under this agreement or any other, have been paid in full. The provision of a cheque or any other bill of exchange will not count as payment in this regard.
- 10.2** The seller will be entitled to immediately take back the goods supplied if the buyer remains in default in any way whatsoever with regard to the fulfilment of payment obligations. In that case, the buyer will be obliged to allow the seller access to the buyer's land and buildings for this purpose.

- 10.3** The buyer must store the goods subject to a retention of title separately from the other goods, in order to be able to continue distinguishing the goods of the seller.
- 10.4** As long as the delivered goods are subject to a retention of title, the buyer may not sell, encumber or pledge these goods, or otherwise place them under the control of third parties, other than as part of its normal business operations. The buyer shall, however, not be permitted to sell the goods within the context of its normal business operations if it has applied for a suspension of payments or if it has been declared bankrupt.
- 11. Suspension and dissolution**
- 11.1** If the buyer fails to perform, fails to perform in a timely manner, or fails to perform to a sufficient degree any of the obligations arising for it from the concluded agreement, or if a well-founded fear exists of such failure occurring, as well as in the case of an application for a suspension of payments order, bankruptcy or the liquidation of any of the buyer's businesses, as well as in the event of the buyer's death, or dissolution if the buyer is a company, or if there is any change in the type of company or in its management or in the contribution made by the company's activities, the seller will be entitled, without notice of default or legal intervention being required, to suspend its own obligations for a reasonable period or to annul the agreement without being held liable for any compensation.
- 11.2** The claim of the seller with respect to the part of the agreement already performed, as well as damage arising from the suspension or termination, which damage includes lost profit, shall be immediately due and payable.
- 12. Intellectual property rights**
- 12.1** The seller reserves all rights which it has in relation to intellectual property rights in respect of products it has supplied.
- 12.2** With regard to cases in which it is apparent from the seller's catalogue or from the agreement entered into by the parties that a variety is protected by plant breeder's rights - which is indicated by a letter R or P after the name of the variety concerned - the buyer will be bound to fulfil all the obligations the said rights entail. Any failure to comply with this stipulation will result in the buyer being liable for the losses incurred by the seller or any third party.
- 13. Severance**
- Should any provision of these general terms and conditions of sale and delivery be non-applicable or in conflict with public order or the law, only the provision in question shall be deemed as not having been written and the rest of the conditions shall remain fully in force. The seller reserves the right to amend the inadmissible provision in order to make it legally valid.
- 14. Jurisdiction, forum**
- 14.1** Any disputes, even if only considered as such by one of the parties, will be put before the competent court in the district in which the seller is registered, without affecting the right of the seller to have the dispute heard by another competent court.
- 14.2** All offers and agreements concluded between the buyer and the seller shall be exclusively governed by the laws of the Netherlands.
